

Trees, Shrubs, and Vines Inventory

Photos and information about each of these is forthcoming.

This is a complete inventory, meaning that it include invasives. I will highlight the invasive trees, shrubs, and vines in red. Although some of these are unwanted in woodlands and savannas in the [Driftless Area](#), they are not considered invasive. Interestingly, there are some natives that carry the invasive label.

Trees

Aspen, Quaking – *Populus tremuloides*

Basswood, American – *Tilia americana*

Boxelder – *Acer negundo*

Cherry, Black – *Prunus serotina*

Chokecherry – *Prunus virginiana*

Elm, Red – *Ulmus rubra*

Hackberry – *Celtis occidentalis*

Hickory, Shagbark – *Carya ovata*

Mulberry, Red – *Morus rubra*
