CODIT – Compartmentalization of Decay in Trees

“The CODIT system is based on two major points. First, a tree is a highly compartmented plant. Second, after a tree is wounded, the resulting defects are compartmentalized.” – From the [NRCS link](#) which is a 76-page graphic illustration of how the tree does this. Excellent reference!

Learning Bird Song

A list of mnemonics for learning bird song.

[Mnemonics, 100 Plus Ways to Speak Bird](#)

A bird song quiz to help:
